

CONSERVE WATER RAIN OR SHINE!

COLORING BOOK

I promise to use water wisely.

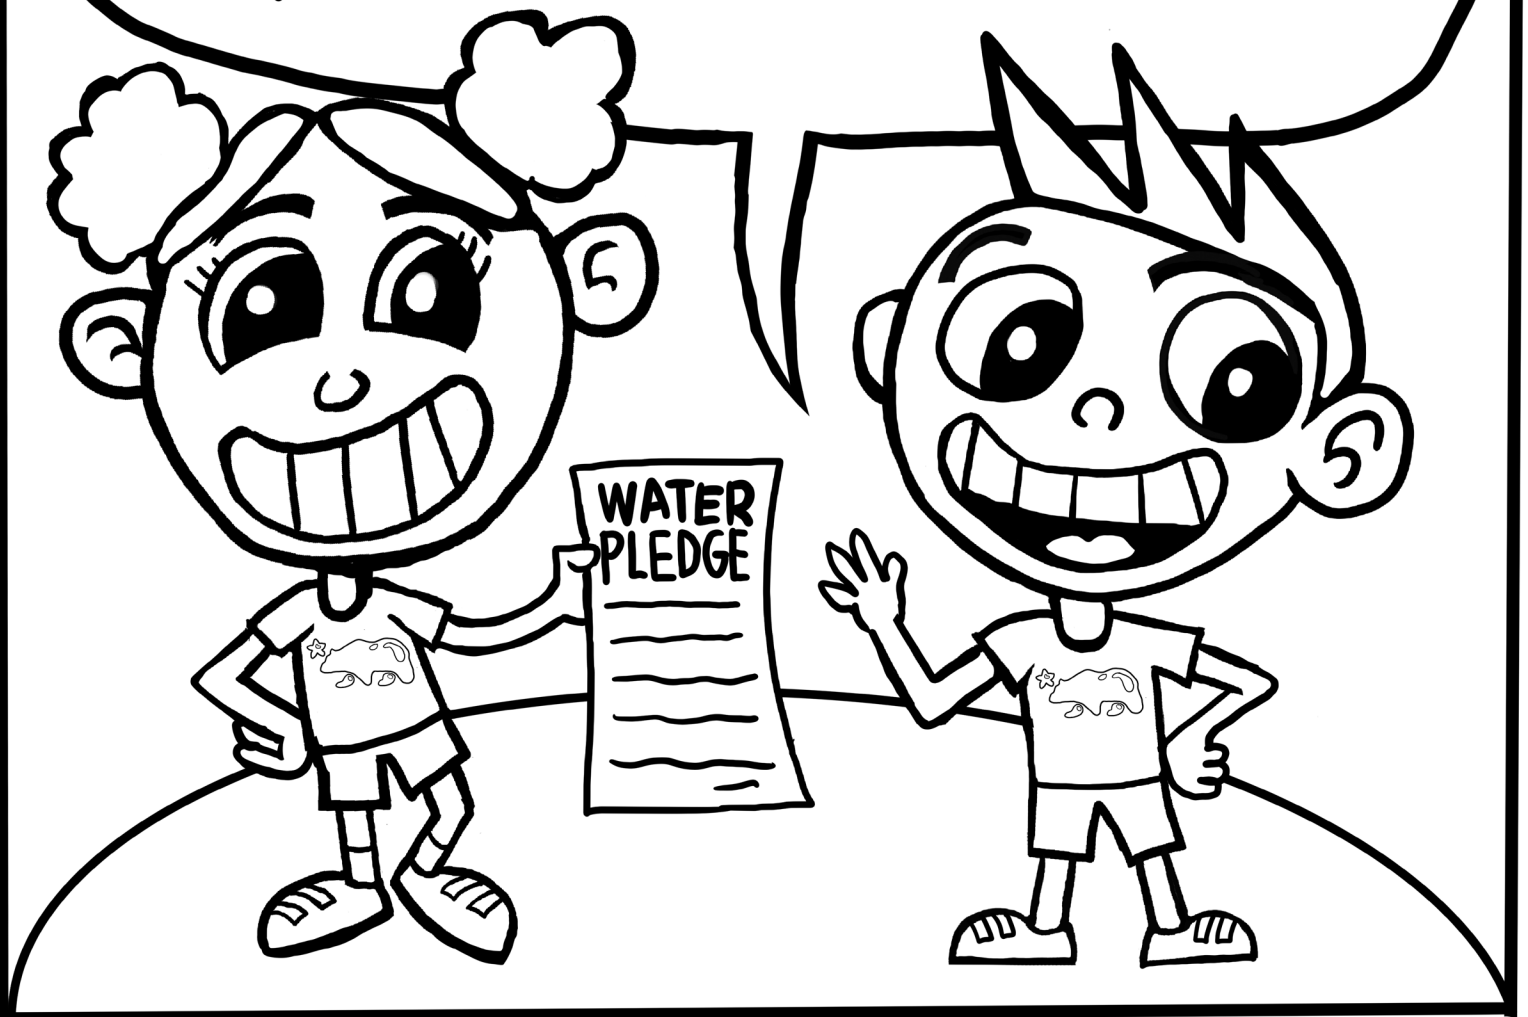

I will use the water saving
tips in this book.

I promise to remind my parents
and friends to do the same.

I will always save water because
I know that water is important.

We must conserve water rain or shine.

My Name: _____.

Water is important.

I save water
rain or shine!

We have the power to save water. Saving water helps the wildlife. Water-wise and California native plants save water. They also make a home for the butterflies, birds, and other insects.

A water-wise plant is a plant that does not need much water to grow.

We are making a beautiful butterfly garden.

There are many ways to save water. Here are a few things you can do.

I turn off the faucet when brushing my teeth!

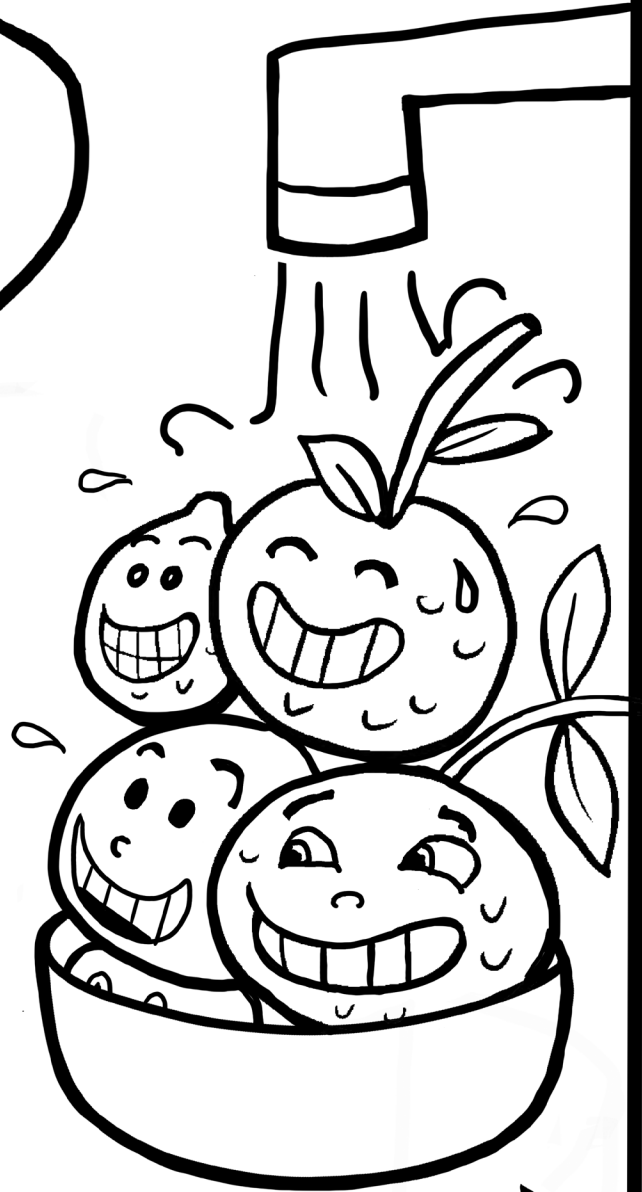

I'm saving
sink water.

Playing
with
water in
the
sink is
wasteful.

We wash our fruits and vegetables in a bowl in the sink to save water.

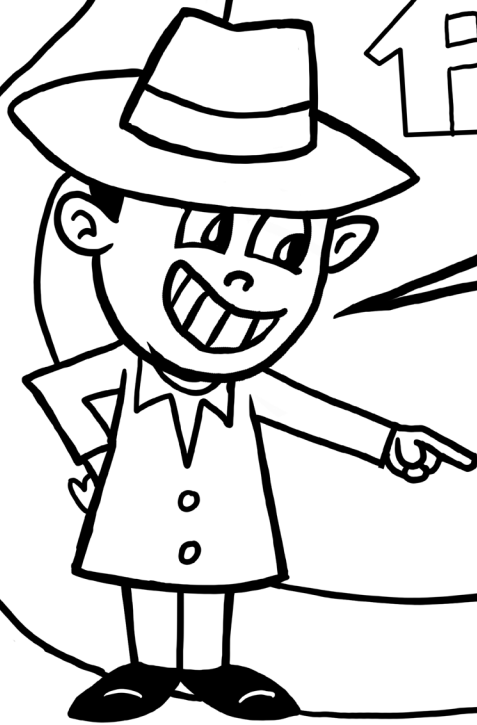

We reuse the water from the bowl to water the plants indoors and outdoors.

We use a broom instead of water to clean the driveway.

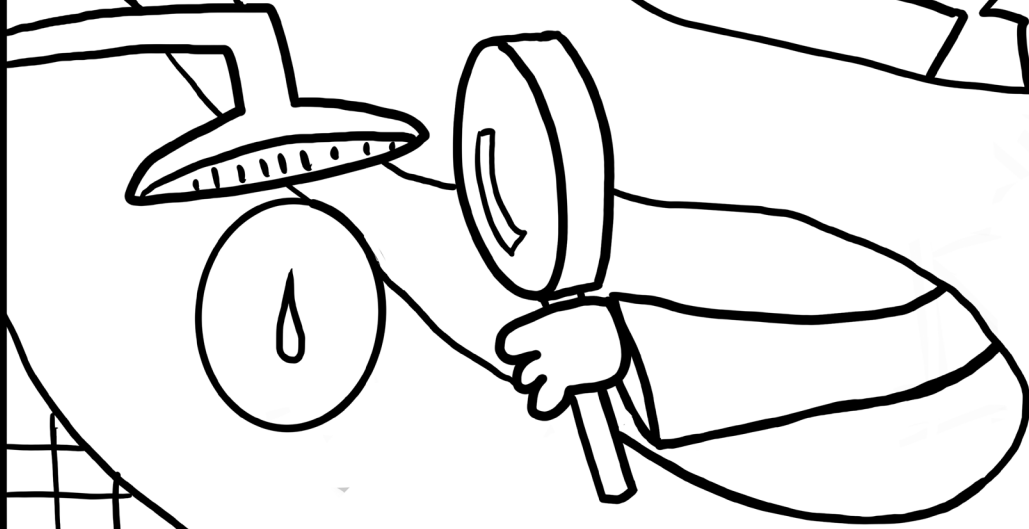

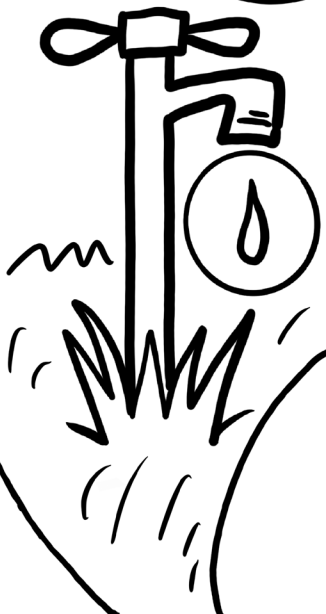

Good job, family!

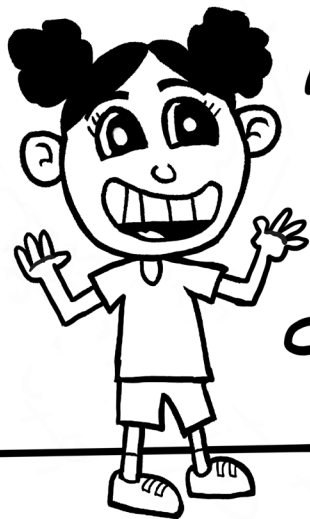

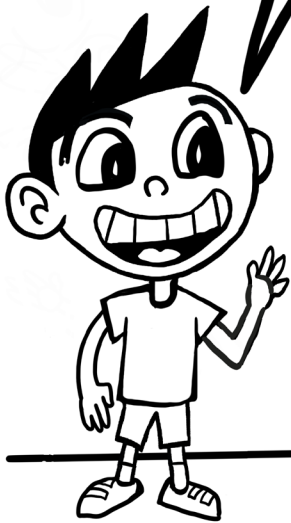

Let's all
be leak
detectives!

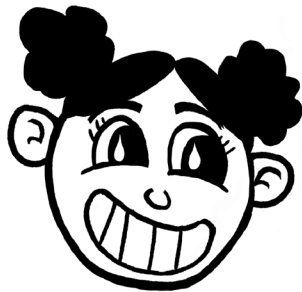

I tell an
adult when I
find a leak.

Let's all be water savers and remind our parents and friends to use water wisely!
