

# Simple Ways to Save Water Around the House

The average Californian uses 196 gallons of water per day! But California is facing an unstable water future. With extreme swings between flood and drought making our future water supply uncertain, every household is being asked to save water.

Use the tips below to make small adjustments around your home that can have a big impact on your water use.

## Fixing toilet leaks

can save up to **200 gallons** of water per day

## Filling the bathtub halfway or less

saves **17–25 gallons** of water per bath

## Recycling indoor water and using it to irrigate your garden

cuts water use by up to **30%**

## Use a dishwasher instead of handwashing

saves up to **24 gallons** per load of dishes

## Installing aerators

makes faucets and shower heads more efficient and saves **0.7 gallons** per minute

## Take 5-minute showers instead of 10-minute showers

save **12.5 gallons** per shower with a water-efficient showerhead

## Fixing leaks inside and outside of the house

saves **27–90 gallons** of water per day

## Turn off water when brushing teeth or shaving

saves **8 gallons** per person each time you brush your teeth or shave

## Washing full loads of clothes

saves **15–45 gallons** per load

**CONSERVE WATER, RAIN OR SHINE.**

# Simple Ways to Save Water Around the Yard

The average Californian uses 196 gallons of water per day, and 60% of that is used outdoors. With extreme swings between flood and drought making our state's future water supply uncertain, every household is being asked to save water.

Use the tips below to discover how small adjustments to your yard can have a big impact on your water use.

## Cutting back on lawn watering

even for one day a week can save up to **20%** more water

## Using mulch

keeps water in the soil and saves up to **30 gallons** per 1,000 sq. ft. each time you water

## Switching to water wise plants

can save **30–60 gallons** per 1,000 sq. ft. each time you water

## Watering early morning or late evening

saves **50%** of sprinkler water otherwise lost to wind and evaporation

## Adjusting sprinkler heads & fixing leaks

can save up to **6,300 gallons** of water per month

## Using a broom to clean outdoor areas

saves **6 gallons** every minute you're not running the hose

## Setting lawnmower blades to 3"

saves **16–50 gallons** per day by encouraging deeper roots

## Installing drip irrigation & adding a smart controller

saves **15 gallons** each time you water

**Check with your local water agency** to learn more about resources or rebates to help make your yard water-wise.

**CONSERVE WATER, RAIN OR SHINE.**
